## 解答例

### [賛成－1]

I <sup>think</sup> believe that students should work part-time for the following reasons. First, it <sup>they can</sup> will enable them to meet a lot of people they cannot meet at school. They will learn a lot about society from them. Second, it will make them realize how important money is. They will find out that it is very hard to make money. [59 語]

### [賛成－2]

I believe that students should work part-time for the following reasons. Firstly, when they complete their education, they have to go out into the real world and face various challenges. Working part-time will help to prepare them for the next stage in their life. Secondly, by having a job they can learn how to manage their money. [59 語]

[反对一1]

In my opinion, students should not do a part-time job. Firstly, if their family is rich enough, they do not have to make money. Secondly, studying is more important for them than earning money. They should spend most of their time studying. For these reasons, I believe that students should not work part-time.

[55 語]

[反对一2]

I do not believe that students should work for the following reasons. Firstly, any time they spend working is time they are not studying. Studying is a student's duty. Probably their parents have paid a lot of money for their education. Secondly, if they do not devote themselves to their studies they might fail their exams. That would be a disaster.
